PROFESSIONAL SUMMARY

Frontend Engineer with experience building scalable SaaS platforms, enterprise dashboards, and dynamic web applications using React and Next.js. Strong understanding of frontend architecture, server-side rendering, real-time systems, and modern state management patterns. Experienced in building complex user workflows, role-based systems, dynamic forms, and AI-powered applications. Comfortable collaborating across product, design, and backend teams to deliver maintainable and production-ready software.

TECHNICAL SKILLS

Frontend Architecture: React, Next.js, React Native, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind, SCSS

State & Data Fetching: TanStack Query (React Query), SWR, Zustand, Jotai, Context API, GraphQL

Forms & UI Development: Formik, React Hook Form, Dynamic Form Builder Systems, Responsive Design, Figma

AI Integration: Claude Code, Gemini CLI, API Integration (OpenAI, Anthropic, Gemini workflows)

Testing & DevOps: Jest, Vitest, Playwright, Git, GitHub Actions, GitLab CI/CD, Docker, Jira

Backend Collaboration: REST APIs, Node.js/Express, FastAPI interaction, Real-time WebSockets, Auth Flows

PROFESSIONAL EXPERIENCE

Freelance Frontend Engineer — Dubai

May 2026 – Present

— **HorecaHub E-Commerce Platform**

(Website)

Next.js, TypeScript, i18n, REST APIs

- Developed and maintained a B2B e-commerce platform for hospitality businesses using Next.js.
- Implemented multilingual support using internationalization (i18n) to provide localized shopping experiences across regions.
- Built barcode scanning functionality to enable faster product discovery and streamlined ordering workflows.
- Integrated voice recognition capabilities, allowing users to search products and add items to cart using voice commands.
- Developed role-based routing and access control systems to support different user permissions and account types.
- Implemented location detection features to personalize user experiences and support region-specific business operations.
- Collaborated directly with stakeholders to deliver new features, optimize performance, and improve overall user experience.

Associate Software Developer

Jan 2025 – May 2026

WebandCrafts (WAC), Kerala, India

— **Caribou Coffee Dashboard**

React, TanStack Query, Zustand, Formik, Context API

- Led frontend development for an enterprise dashboard handling operational and management workflows.
- Built scalable and reusable dashboard modules with modular component architecture and centralized state management.
- Implemented role-based UI rendering and protected route workflows based on user permissions and access levels.
- Developed complex multi-step forms and approval workflows while maintaining compatibility with existing project architecture.
- Integrated real-time updates using socket-based communication to improve live operational visibility across the platform.
- Collaborated closely with backend and QA teams to deliver stable production-ready releases.

— **VGuard Charity Management Application**

React, SWR, Formik, Jotai, Context API

- Served as Frontend Lead Developer for a charity management platform handling beneficiary management and financial disbursement workflows.

- Implemented role-based UI previews and access-controlled routing systems for different user types and administrative levels.
- Built installment splitting and merging tools to support flexible charity disbursement operations and payment tracking.
- Developed a dynamic form builder system allowing administrators to create and manage custom forms based on operational requirements.
- Engineered complex workflow-driven interfaces and step forms while preserving existing project stability and scalability.
- Added real-time socket updates to improve collaboration and operational transparency across teams.

— **Middlesex University Dubai Official Website** (Website)

Next.js, SWR, Formik, SSR, TanStack Table

- Developed and maintained large-scale university web platform with dynamic backend-driven page architecture supporting 1500+ pages.
- Implemented server-side rendering (SSR) strategies to improve SEO performance and page load speed.
- Built complex admission and enquiry forms with validation workflows and backend integrations.
- Developed dynamic routing and slug-based page rendering systems using Next.js folder-based architecture.
- Improved routing reliability, frontend maintainability, and overall user experience across devices.

— **IKEA Food Platform** (Website)

React, Magento, GraphQL

- Built a dynamic ordering platform with optimized cart and checkout flows
- Integrated GraphQL APIs for product data, transactions, and order management
- Implemented clean API communication layers and asynchronous request handling for improved user experience.

Frontend Developer Apr 2023 – Dec 2024

Waterfall Pumps, Dubai, UAE

— **Waterfall Pumps Corporate Platform** (Website)

- Developed and maintained a corporate web platform showcasing industrial products, technical catalogs, and company services.
- Built responsive frontend interfaces with optimized layouts and improved SEO visibility for product-focused pages.
- Collaborated with design and content teams to implement scalable and maintainable UI components.
- Improved frontend performance through asset optimization and responsive rendering strategies.

Junior Web Developer Jul 2022 – Mar 2023

Technoid FZE, Dubai, UAE

— **Moishi E-Commerce Platform (UAE/Egypt)** (Website)

- Developed responsive Shopify storefront interfaces for a multi-region dessert brand operating across UAE and Egypt.
- Built mobile-friendly user interfaces and optimized customer shopping experiences across devices.
- Worked on dynamic product presentation and content-driven eCommerce workflows.

— **Technoid Corporate Website** (Website)

- Developed and maintained the company’s corporate website and service pages.
- Improved frontend responsiveness and overall website performance through optimized asset delivery and reusable UI patterns.

EDUCATION

Bachelor of Computer Application Jun 2022

Calicut University

ADDITIONAL INFORMATION

Languages: English, Hindi, Malayalam, Urdu

Interests: Frontend Architecture, AI-Assisted Development Workflows, Performance Optimization

Date of Birth: 21/03/2001
